Steps Involved In Project Management Process

- **Initiation:** The name is itself an explanation. During this phase, the feasibility of the project is measured, i.e. whether the project is suitable for the present set of preferences or not.
- **Planning:** Planning refers to the formulation of the every important aspect required to materialize the desired goal in the desired time period. An overview of the points to be considered while planning includes resource allocation, defining budgetary limits, act of conduct, and deadline. Depending upon the size of the project, several parts are introduced and eliminated to provide the most relevant super hot plan to it.
