# Novicorp WinToFlash Professional V1.8.0000 Free Download

Reviews WinToFlash Professional is a data recovery software, that allows you to search lost or deleted documents and pictures from any storage media. WinToFlash can recover or restore individual files, folders or the whole partitions, even if you do not have the original or backup CD/DVD disc. Features: Search files by their file name, file size, date, name extensions and content. Cleaning Registry and Windows system files. More than 40 tools for recovery of your data, including tools for secure wipe, copy, format, delete, backup, restore and much more. Find the most appropriate tool for each task - automatic and manual recovery mode. No additional programs are required to use WinToFlash Professional - it is just a stand-alone program that can be run from any USB flash drive or any external hard disk. WinToFlash Professional is the universal data recovery software that works with any storage device, removable media, or portable hard drive with FAT, NTFS, and exFAT file systems. All the functions of WinToFlash Professional can be used from a single interface. Version history: Version 1.0 - WinToFlash Professional will be released. Version 1.1 - Fixed a bug that was preventing the program from working on Windows 10. Version 1.2 - Fixed a bug that was preventing Windows Explorer to show search results. Version 1.3 - Added a new tool to recover individual files. Version 1.4 - Added a new tool to recover individual files from partitions of different file systems (NTFS, FAT, exFAT, exFAT 12, exFAT 16, exFAT 32). Version 1.5 - Added a new tool to search for files and recover all files in a folder and subfolders. Version 1.6 - Added a new tool to fix boot sectors of a device and to remove its MBR. Version 1.7 - Added a new tool to create a bootable Windows 7 USB flash drive from an existing installation package. Version 1.8 - Added a new tool to download and install Windows XP and Windows 7 installation packages from a USB flash drive or external hard disk. Version 1.9 - Added a new tool to create a bootable Windows XP installation package from an existing installation package. Version 1.10 - Added a new tool to recover files from damaged USB flash drive. Version 1.
