---

sensor monitors the health of virtual or physical disks on your Windows servers. It is the product of a collaboration between community members... RiseTime from CCA Technologies, Inc. (NYSE: CCA) today announced that it has been named a worldwide partner in the WMI Hypervisor Support initiative. The WMI Hypervisor Support initiative is a joint effort between Microsoft and Intel that aims to provide a solution for virtualization management and data-access monitoring on guest operating systems. The approach allows for optimization of hypervisor performance and reducing operating system usage and ... Support Center Online for MS Azure, Private Cloud, and Cloud Foundry are now available at the MS Support Center site. From the site home page, select Support Center Online to learn more about this service offering. The support team is committed to providing you the best support experience possible. The Microsoft Monitoring Analytics and Diagnostics Experience (MDAx) solution will replace Performance Monitor and the WMI Sensor/Analyzer. We have been working on this since the mid-2000s, and we are excited to share with you the latest features of MDAx. MDAx in the .NET Platform Group offers the latest features and functionality to monitor, diagnose, and troubleshoot systems using .NET framework programming. For example, the f3e1b3768c
