What if the office plant is not big enough to accommodate your two-person team. It's best to find a separate office space for your two-person team, or for your entire office group. You can do this by just sharing a one- or two-person office space with another department, or in the same department with another person. This avoids the issue of losing a portion of your salary due to overtime, which is generally only covered for the first 80 hours of your workweek, so if your working as a two-person team you're better off not
