The author has also written other science fiction novels, such as The Sprawl trilogy and Burning Chrome. These novels can be characterized by its cyberpunk themes and style. Cyberpunk has been applied to a wide variety of stories that can be categorized as science fiction or fantasy. The genre's use of complex technology and a gritty portrayal of street life has made cyberpunk popular with younger audiences and attracted criticism from more traditional genres and critics. Since cyberpunk is a relatively new genre, it can be a difficult genre to classify. The genre has been labeled cyberpunk and cyber culture. It has been categorized as cyberpunk in other publications. A general theme of cyberpunk is that of artificial intelligence and the rise of it. Literary scholar Bill Stapp has identified the birth of cyberpunk as occurring during the late 1980s. Cyberpunk novels are often about a dystopian future where many people are killed or harmed by computer viruses, or about the replacement of natural bodies with cybernetic bodies. The most characteristic aspect of cyberpunk is the increased use of technology, often provided in a dystopian future. However, the term "cyberpunk" was not coined in the s, but later. In the eighties, cyberpunk began to appear as a Other famous cyberpunk novels include Neuromancer, Count Zero, The Difference Engine, All Tomorrow's Parties and Johnny Mnemonic. Many of these novels have been adapted into movies, and the films have sometimes been successful with mainstream
