This add-on is free to download on PlayStation Store and is only available for PS4 version of Bad Piggies. The DLC is called Season Pass and it is available in

Pigs of Angry Birds 2 is a sequel to the game Bad Piggies, released in November 2013. To enter the game, it is necessary to place 100% of the money in the bank. When the game starts, a screen appears which lists the 200 animals in the bank, divided into categories. The player begins to lose money, and the animals will disappear. Each animal is reduced by one or two points of money. When you click on the animal, you can see a chat with a pig on it. With the Animal Calculator, you can have information about the animal. By clicking on a pig, it loses 1/2 of its points, and the money that was in its bank. On the top menu, the game has a list of difficulties with a slider to select the difficulty. It has three difficulties. The player must pass, and win the game of the various game modes. The game modes are Casual: the game is over when you pass. Easy: In this mode, the player is allowed to pass when his bank is less than 30%. Professional: When your bank is less than 10%, you can not pass the game. The difficulty of the game has an effect on the ratio of the animals that are lost. It can also make the money that you lose in a game. Some pigs have special skills that enable the player to pass through others or do not lose money. Game mode The player can win one or more challenges. In the first one, the pigs play and then they make an alliance with the player. The alliance of pigs consists of five of them. You can make an alliance in the game, clicking on one of them, and by clicking on the menu (Esc key or P) you can make the alliance, and you can see that they have seen. For example, you can make an alliance with the Bacon. Pigs could win a time to win the game. These games are called games of escape. When the time ends, the pig will win the game and he will be reset to its previous stage and the game will continue. He can win a bonus time of 100 seconds for a maximum of 3 times. This bonus time is not a free time of survival, as the player still loses money. The game has the time

of free survival. It is an automatic free time of survival. Every few seconds, you will have a free time to survive for five seconds, but
