This unique software system (www.ohms.com) is designed specifically to support the management of oral health, particularly for the corporate market, but is equally effective for private use. It includes a range of calculators, reports and statistical tools to help you, your dental practice and your patients. The system is very easy to use and is made to deliver information that will be of benefit and will encourage people to visit their dentist regularly. It is one of the most popular business management applications on the market. OHMS Business Software Review 1. What is the OHMS? OHMS stands for Oral Health Management System. It provides a suite of dental software to manage every aspect of your practice: accounting, billing, dental records, patient management, marketing and more. OHMS is a comprehensive dental management solution that can be used by any dental practice. It will change the way your dental practice operates. In fact, it's a software system that has made the dentist a more powerful 2d92ce491b
