I have not added any support for Mac OS10.5, and I have not added any support for Windows 98. This is because there are very few people that are running Mac OS10.5 and Windows 98. Even if you could use this on a Mac and Windows 98, I don't think it would work, and if it did then then you would be doing so at your own risk. If you are running a Mac and you are running OSX 10.4 and you want to load your Word files back in with the new OSX version, then you need this software. You can download the ZIP file from [HERE](#) and unzip it to your desktop. The ZIP file contains a folder called FOO that has the following files in it. word2007fix\_mac.exe - The EXE file that you run to install the software. word2007fix\_mac.txt - Instructions for using the software Now you need to double click the EXE file and choose the file and click OK. The software will install itself and it will then ask you what new version of Word you want it to work with (if it doesn't already work with it). The next thing you need to do is choose which version of Word you want it to work with (and it is not backwards compatible). On the dialog box that displays, there are three tabs. Table of Contents - On this tab, you can
